These may include, but are not limited to, items such as capital with perpetual maturity, non-maturity deposits, short positions, open maturity positions, non-HQLA equities and physical traded commodities.*

Notes:

1. Net Stable Funding Ratio (NSFR) is defined as amount of available stable funding relative to the amount of required stable funding.
2. The reported values are based on September 2026 month end figures (consolidated level).

Comments:

- As of 30 September 2026, the Bank's NSFR was at 208%.
- The amount of Available Stable Funding (ASF) is based on the broad characteristics of the relative stability of the bank's funding sources, including the contractual maturity of its liabilities and the differences in the propensity of different types of funding providers to withdraw their funding.
- The amount of Required Stable Funding (RSF) is based on the broad characteristics of the liquidity risk profile of the Bank's assets and off-balance sheet exposures.
